DETAILED ACTION

This is a response to election filed 4/25/2003 for electing claims 1-13 for further examination.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ashby et al. (USP 5,095,233). Figure 8 shows a shift clock signal generator comprising a reference clock signal (REFCLK), a delay line including a plurality of delay elements (150-154, 166-170) connected in cascade, wherein each delay unit has a prescribed delay time, a shift clock signal output path (outputs of 156, 158 and 160), a group of switches (156, 158 and 160) having first ends connected with output terminals of the unit delay elements, respectively, and a second ends connected with the shift clock signal output path, wherein when specified one among the switches is in its on position, a delayed clock signal which results from delaying the reference clock signal by a prescribed time interval is transmitted via the specified switch to the shift clock signal output path as the shift clock signal; and a switch controlling means (226, 230, 236, 234) for determining the specified one among the witches on the basis of data representing a phase difference of the shift clock signal from the reference clock signal and for setting the specified switch in its on position as called for in claims 1 and 7.

Regarding claims 2-5, the plurality of delay lines, group of switches, a plurality of switch

Art Unit: 2816

controlling means are seen as the additional delay line 184 which has identical structure of the delay line 142.

Allowable Subject Matter

3. Claims 6 and 8-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In this regard, applicant's cited prior art has been considered.
